

King's Keys

Collection Agency

2-4 Players

How many groups can you spot to add to your collection?

www.JankenDeck.com/Kings

Story:

You are in charge of collecting special groups of cards. Spot and collect groups of three cards with all matching or mixed Parts!

The Object:

Collect as many groups as you can.

The Deck:

Remove the Jokers and Kingdom/Color cards.

The Deal:

Deal 12 cards face up in a 3 by 4 arrangement. Set aside the remaining cards as a draw pile. (See diagram on Page 2)

The Play:

The player to the left of the dealer begins.

Players take turns making groups of three cards from the arrangement to keep for themselves.

To make a group, the three cards must have all of these qualities:

Numbers that are all the same OR a run of 1, 2, 3 or 2, 3, 4 (but NOT 1, 3, 4 or 1, 2, 4)

Three items that are all the same OR all different

Three colors that are all the same OR all different

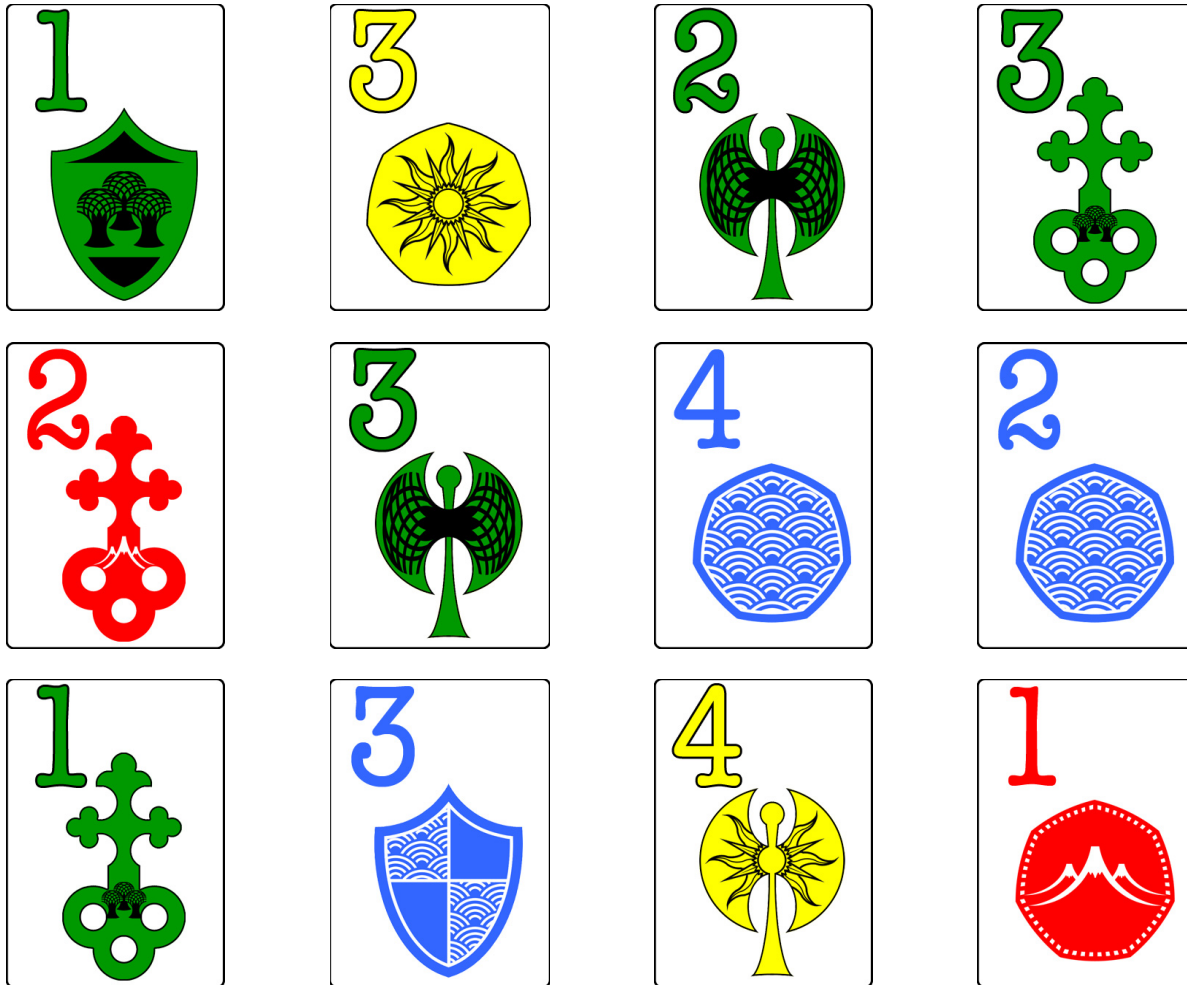

When it is your turn, if you spot a valid group of three, pick them up and put them in a stack next to you. If you spot any other groups you can take those as well. When you don't see any more groups, deal new cards to replace the ones that you took and play is passed to the next player.

The End:

When there are no more cards left in the draw pile and there are no more groups left to be made, the game is over. Each player counts how many groups they collected. The player with the most groups wins!

How many groups can you spot to add to your collection?

Deal 12 cards face up in 3 by 4 arrangement

Did you spot any of these groups?
